

U.S. Army Telemedicine & Advanced Technology Research Center - TATRC

December 9, 2014

Yesterday Dr. Gary Gilbert, Lab Director for TATRC's Operational Telemedicine Lab chaired the Battlefield Medical Informatics Workshop at the Special Operations Medical Association's Scientific Assembly and Exhibition in Tampa, FL. The panel discussed the historical background and context for previous projects of prehospital electronic medical record systems as well as a civilian perspective on this topic. The talk will also cover the DoD wide Electronic Health Record Modernization project and the charge of further inclusion of prehospital (role 1-3) systems and highlighted ongoing projects, innovations, and research in this area.
